Your Timely Partner Event to Participate in D.P.R. Korea's Business Growth Potential!

More than ever before, the D.P.R. Korea is trying to join the world markets. The peace process and exchanges on the Korean Peninsula are progressing with increasing vigor, while the journey towards openness and reform continues. Overcoming problems of the past decade, this highly industrialized country is once again aiming to take a center stage.

Global players are beginning to seriously eye the investment opportunities, business and trade that will flow in the coming years.

The first of its kind in the Democratic People's Republic of Korea, our international platform "Pyongyang International Technology and Infrastructure Exhibition" (Pyongyang ITIE), in 2002, was concluded on a high note of optimism and expectations. The event, with 12,000 trade visitors and 70 companies from 10 countries (including two National Pavilions from Germany and Italy) saw the unprecedented cultivation of business connections on an impressive level, as they entered the newly opened "doorway" into the Democratic People's Republic of Korea. Past exhibitors have prompted to follow-up on the business goodwill already built while new interest is also growing, especially from companies in South Korea, for Pyongyang ITIE to serve as the critical doorway again.

In this regard, we are pleased to invite you to participate in the next Pyongyang ITIE 2006, organized jointly by Messe München International (MMI) and Korea International Exhibition Corporation (KIEC). The event is part of MMI's global network of infrastructure and technology trade fairs, for new and emerging markets. It aims to establish an international forum for the D.P.R. Korea and the World to meet, discuss and ink long term ventures and business deals.

Be among the early movers to gear up for the business prospects in Asia's next growth market. Join Pyongyang ITIE 2006 for your foothold in a country on the way to partake in Northeast Asia's prosperity. Here is your timely opportunity to get familiarized with the economic setting and overall business atmosphere, and to establish contacts with buyers and partners for future business expansion in the Democratic People's Republic of Korea.

Make it a point to really understand this largely untapped market place! Make that decision to participate today.

Be one of the trailblazers among foreign companies with this unparalleled opportunity to explore the hidden potential this country has to offer!

Don't miss your chance to be one of the first to establish a coveted foothold in the DPRK by presenting your company to an exclusive audience in a single location. Use this unique business platform to seek future partners for distribution and after sales services.
